a description of the english language as a dynamic system in the evolutionary process of radical typological restructuring which has deeply affected its constituent subsystems grammatical lexical and phonic

this monograph offers a radical reconceptualization of the relationship between the poetics and practice of robert burns and reevaluates the nature of his role in the history of scots by drawing on ideas from twenty first century sociolinguistic theory it seeks to transform the debate surrounding burns s language through a series of readings that explore the way in which burns used and commented on the styles associated with

different places groups and genres it demonstrates how languages places and the identities associated with both are in Burns's writing subject to continual reinvention in this respect the study breaks with existing accounts of the subject insofar as it presents Scots English and the other languages used by Burns not as fixed empirically observable entities but as ideas that were revised and remade through the poet's work focusing on Burns's poems songs letters prefaces and glossaries the book pays special attention to the complex ways in which the author engaged with such issues as phonology grammar and the naming of languages the Burns who emerges from this book is not the marginal figure of traditional accounts an undereducated poet alienated from the philological mainstream but rather a well informed thinker who more than any other contemporary writer embodies the creative linguistic spirit of the eighteenth century

until quite recently the term diaspora usually with the capital meant the dispersion of the Jews in many parts of the world now it is recognized that many other groups have built communities distant from their homeland such as overseas Chinese South Asians Romani Armenians Syrian and Palestinian Arabs to explore the effect of exile of language repertoires the article traces the sociolinguistic development of the many Jewish diasporas starting with the community exiled to Babylon and following through exiles in Muslim and Christian countries in the middle ages and later it presents the changes that occurred linguistically after Jews were granted full citizenship it then goes into details about the phenomenon and problem of the Jewish return to the homeland the revitalization and revernacularization of the Hebrew that had been a sacred and literary language and the rediasporization that accounts for the cases of maintenance of diaspora varieties

the relationship between power and language has been a central theme in critical theory for decades now yet there is still much to be learned about the sheer force of language in the world in which we live in Empire of Language Laurent Dubreuil explores the power language phenomenon in the context of European and particularly French colonialism and its aftermath through readings of the colonial experience he isolates a phraseology based on possession in terms of both appropriation and haunting that has persisted throughout the centuries not only is this phraseology a legacy of the past it is still active today especially in literary renderings of the colonial experience but also and more paradoxically in anticolonial discourse this phrase shaped the teaching of European languages in the former empires and it tried to configure the usage of those idioms by the indigenes then scholarly disciplines have to completely reconsider their discursive strategies about the colonial if at least they attempt to speak up Dubreuil ranges widely in terms of time and space from the Ancien Régime through the twentieth century from Paris to Haiti to Quebec from the Renaissance to the riots in the banlieues he examines diverse texts from political speeches legal documents and colonial treatises to anthropological essays poems of the Négritude and contemporary rap ever attuned to the linguistic strategies that undergird colonial power equally conversant in both postcolonial criticism and poststructuralist scholarship on language but also deeply grounded in the sociohistorical context of the colonies Dubreuil sets forth the conditions for an authentically postcolonial scholarship one that acknowledges the difficulty of getting beyond a colonialism and still maintains the need for an afterward
